PERSONAL PROJECTS

FitQuest (04/2024 - 06/2024)
- An all-in-one creative website designed to help users track calories, exercises, and body metrics. Includes features for goal setting and provides analytical data insights to enhance users' fitness journeys. Developed with a focus on usability and personal health management.

Ethiopian Railways (02/2023 - 06/2023)
- As part of my final year project in Computer Science, I developed a comprehensive web-based application for booking train tickets within the Ethio-Djibouti railway system. This project aimed to streamline the ticket booking process, providing users with a convenient and efficient platform to reserve their seats for travel.
